SUMMARY

Product manager with 8+ years across a marketplace I founded, a web app and an EdTech course catalogue. I run product from customer discovery and PRDs through launch, KPIs and iteration, and I train the people who work with me.

Key results: ₹600K bookings in 2 months | 8:1 LTV to CAC | 50% month-over-month growth | 24% higher course completion | course updates cut from 80-90 to 30-45 days

EXPERIENCE

Product Manager

Sep 2022 to Present

K2 Partnering Solutions (K2U, formerly Focus on Force), Remote

- Took an AI workflow from idea to approved build: user interviews, wireframes, flowcharts and a management pitch. Engineering built it.
- The workflow reads Salesforce release notes and flags course content to update. Update cycles fell from 80-90 days to 30-45, with 3 people instead of 5.
- Led a learner progress dashboard from interviews and wireframes to an approved build; it helped lift course completion by 24%.
- Owned a 57-course Salesforce portfolio and launched about 45 courses, from demand research to launch and maintenance.
- Prioritised the course backlog using RICE, and sized demand, competitors and pricing for each new course.
- Defined the KPIs for every product at launch and tracked them afterwards; prepared post-launch projections.
- Spoke with learners after purchase to learn why they bought and where they got stuck.
- Proposed a learner retention and lifetime value feature; the first part was built.
- Tested new Salesforce apps in dev and UAT orgs and logged bugs for developers.
- Ran delivery in Jira (kanban, agile or waterfall) within approved budgets, with engineers, external experts and marketing.
- Trained and onboarded every new team member, and wrote the onboarding procedures.
- Led the catalogue content move during the Focus on Force to K2U rebrand.

Founder and CEO

Dec 2019 to Jan 2023

Phatse (Celebratious), Gurgaon, India

- Founded an online party marketplace: customers booked food, cakes, decorations and flowers from nearby organisers; we earned 20% commission.
- Reached ₹600K in bookings in the first 2 months: about 85 orders at a ₹7,000 average order value.
- Designed an instant referral reward: acquisition cost near ₹600 a customer against ₹4,800 commission over 2 years (8:1). It drove 50% month-over-month growth and cut churn by 22%.
- Used Mixpanel for product analytics, tracking how customers used the app and where they dropped off.
- Interviewed 100+ customers and event organisers and set roadmap priorities from what they said; NPS rose 30%.
- Set the product vision and roadmap. Wrote user personas, PRDs and user stories and worked through them with engineers.
- Ran A/B tests to compare versions of features and campaigns, and kept what performed better.
- Led a team of 18: 8 engineers, 5 in sales and marketing, and 5 interns. Ran Google Ads for acquisition.
- Named among India's Top 25 startups at the BITS Pilani Entrepreneurship Conclave 2021.

Product Manager

Nov 2017 to Dec 2019

SearchFinn Inc., Makati, Philippines

- Worked with engineers to rebuild a multi-page web app as a React single-page app, cutting load time by 40%.
- Made wireframes and prototypes with the design and engineering teams.

F&B Supervisor

Dec 2010 to Jun 2017

Carnival UK (P&O Cruises), Southampton, UK

- Managed Marco Pierre White's onboard restaurant and a dining team of 60 across the 7-ship fleet, with an NPS above 80 on 85%+ of cruises.
- Trained new joiners in safety, hygiene, order handling and guest service.

Creative Director and Producer

Part-time

Dark Brew (YouTube)

- Grew the channel from 0 to 5,000+ subscribers and 320,000+ views in 5 months; it reached monetisation within 2 months.
- Built audience personas and ran A/B tests on content to decide what to make next.
