WORK EXPERIENCE

Product Manager (Content and Learning Lead) | K2U

Sep 2022 - Oct 2026

Formerly Focus on Force | Remote, India

- Owned the end-to-end lifecycle of a 57-course Salesforce training portfolio: demand research, target-customer definition, build-versus-external-SME planning, launch and ongoing maintenance. Personally launched about 45 courses.
- Joined discovery calls with corporate clients (accounts led by the sales team) to scope instructor-led team training, and tailored course content to each client's needs.
- Led the content transition across the catalogue during the rebrand from Focus on Force to K2U.
- Planned and tracked delivery in Jira (kanban boards, with agile or waterfall by project) and delivered within approved budgets.
- Uploaded, configured and published courses on the LearnDash LMS, and kept them current through Salesforce release cycles.
- Conceptualised an AI-assisted release-note workflow (built by engineering) that flags the exact course content needing updates: update cycles fell from **80-90 days to 30-45 days (about 55% faster)**, and the team needed dropped from 5 to 3.
- Managed external SMEs and partner organisations: scoping, relationship management, invoice approval and partner course launches.
- Spoke with learners after purchase to understand their motivations and pain points, and proposed pricing for each new course based on competitive analysis.
- Built a learner progress dashboard that helped lift overall course completion by **24%**.
- Trained team members and wrote onboarding SOPs and procedures.
- Wrote a marketing brief for each launch to support post-launch promotion.
